Subject: checking in

Hello David I just wanted to check in and make sure things are going smoothly on 10.9 from your perspective. Our role here is to support your efforts and help out in any way we can. I know Tony has been working with you and Wanda and I have been reviewing those materials. Just want to make sure things are meeting your expectations. Drop me a line when you get a second ok? And at any time in the project please let me know if there is anything that can be done better. Hope all's well.

Ray

Subject: Site signage; Passaic Lyndhurst

Tony, as I indicated in our last conference call I have attached the sign that was posted on the fence surrounding the Diamond Alkali site for the sediment removal project. This is what we did for that project. I copied Stephanie on this email for her to also weigh in on whether this is the type of sign for Lyndhurst or if something else is more appropriate.
